Globex Industries - IT Security Standards
Document GX-SEC-001, revision 5, effective 1 March 2026. Owner: Information Security.

1. Scope
These standards apply to every Globex employee, contractor and vendor who uses a Globex account, device or network. Exceptions must be approved in writing by the Chief Information Security Officer (CISO).

2. Passwords and authentication
Passwords must be at least 14 characters long. Passwords do not expire on a schedule, but must be changed immediately if a compromise is suspected. Reusing a password from any other service is prohibited. Multi-factor authentication (MFA) is mandatory for email, VPN and all production systems; hardware security keys are required for administrators. Accounts are locked for 15 minutes after 5 failed sign-in attempts.

3. Devices

Only Globex-managed laptops may access internal systems. Full-disk encryption must remain enabled at all times. Screens must lock automatically after 5 minutes of inactivity.

Personal phones may access email only through the approved mobile management app. Lost or stolen devices must be reported to the IT Service Desk within 1 hour of discovery.

4. Data classification

Globex data has four classes: Public, Internal, Confidential and Restricted. Restricted data (customer personal data, payment data and security keys) may only be stored in approved encrypted systems and must never be sent by email. Confidential data may be shared externally only under a signed NDA.

5. Security incidents
Suspected security incidents, including phishing emails that were clicked, must be reported to security@globex.example or the 24x7 Security Hotline at +1-555-0142 within 30 minutes. Do not try to investigate an incident yourself. Confirmed incidents involving personal data are escalated to the Data Protection Officer within 24 hours.

6. Software and AI tools
Only software from the Globex Software Catalog may be installed. Confidential or Restricted data must not be entered into public AI tools; the approved internal AI assistant may be used for Internal data.

7. Access reviews
Managers review their team's access to systems every quarter. Access is removed within 24 hours of an employee leaving Globex.
